

Save Energy, Save Money

SMECO is offering financial incentives and technical assistance to help businesses of all sizes save energy and money. Through our **Business Solutions** program, your business can receive incentives that cover up to 50% of the total cost of retrofits and up to 75% of the incremental cost of new construction for projects to improve energy efficiency.

Typical energy efficiency measures include:

- Lighting
- Motors
- Unitary HVAC
- Variable Frequency Drives
- Commercial Refrigeration
- Custom Projects

Reduce Energy Costs, Increase Comfort at Home

With the arrival of warmer temperatures, it can be challenging to maintain your home's comfort, while keeping your energy costs in check. SMECO's **Home Performance with ENERGY STAR®** program can help you do just that.

Instead of tackling energy problems individually, such as replacing an old heating and cooling system or fixing leaky ductwork, Home Performance with ENERGY STAR looks at a home as one system and recommends improvements for better, more comprehensive results. Plus, SMECO offers cash incentives up to **\$1,300** toward the cost of eligible measures.

You'll also benefit from:

- Possible energy savings of 20% or more
- Less drafty, more comfortable rooms
- Specially trained contractors to do the audits and complete the work
- Third-party quality assurance to ensure the job is done right

Take the first step! Schedule your home energy audit with a certified home performance contractor by calling **866-235-6044**, or visit **SMECO.coop/save** for more information.
