

Build in Energy Efficiency From the Ground Up

Make SMECO's ENERGY STAR® for New Homes program your blueprint for year-round savings and comfort.

SMECO
People. Power. Progress.

SMECO.coop/save

Designed to Help You Forget the Weather

This winter's icy blast pushed energy use and costs through the roof. An ENERGY STAR Certified Home offers energy-saving features that make them up to 30% more efficient than standard homes. That means you will save on heating and cooling costs—the biggest chunk of your monthly energy bill.

ENERGY STAR Certified Homes typically have:

- Effective insulation
- High-performance windows
- Tight construction and ducts
- Efficient heating and cooling equipment

You'll save money on energy and maintenance costs, plus your home will be more comfortable and have improved indoor air quality.

Learn how SMECO's ENERGY STAR for New Homes program can help you build energy efficiency into your next home. Go to SMECO.coop/save or call **877-818-4094** for details and to find a builder.
